

MFOS

Seven Segment Linear Envelope Generator Rear View Panel Wiring Diagram

IMPORTANT NOTE
X3, X6, X5, X8, and X9
on the selector switch
should be connected to
the pot terminals with
the same designator
shown below. There is
only one donut pad per
Xn on the PC board.

Selector switches
vary in form factor.
Apply the description
found in the circuit
details to the configuration
of your switch.

S4 is a DPDT Center Off
Mini Toggle Switch

All threshold and slope
control pots are smaller
pots if using this layout.
Large (24mm) pots will
not fit.
Amphenol style phone
jacks are shown.
